Profile Summary

- Results-oriented second-year undergraduate student with a passion for technology and a diverse skill set in website design, money management, and competitive programming.
- Possessing a keen eye for design aesthetics, a strategic mindset for financial planning, and strong problem-solving abilities honed through competitive programming challenges.
- Committed to delivering high-quality solutions and continuously enhancing skills in both technical and financial domains. Always searching for profit-making opportunities.

Work Experience

Key Skills:

- **Website Design:** Proficient in front-end development technologies such as HTML, CSS, and JavaScript. Experienced in creating visually appealing and user-friendly websites, with a focus on responsive design and cross-browser compatibility. Design A front-end website for my merchandise store.
- **Business Management:** Started A fully profitable merchandise business in college including operations like product design, manufacturing, logistics, sales, delivery, low pricing. Also achieved a 100 % profit margin through it. Planning to start a next import-export retail business.
- **Product research:** I was planning to start a retail business. For this I search numerous of product which have high demand in Indian markets. Used Etsy, Amazon and various tools for product search. Also Consulting from numerous of retail business owners.
- **Investing and Analysing:** Conducted in-depth analysis of company financials and industry trends to inform investment decisions for a personal portfolio holding **STOCKS, CRYPTO, MUTUAL FUNDS, SGBs, T-Bills**. I was doing this market research from past one year.
